Could your student project win the

CLEAN STUDENT AWARD?

CALLING ON STUDENTS WITHIN ENVIRONMENTAL ENGINEERING, ENERGY ENGINEERING, BUILDING ENGINEERING ARCHITECTURAL TECHNOLOGY AND CONSTRUCTION MANAGEMENT, OR SOMETHING ELSE WITHIN A TECHNICAL FIELD – COULD YOU BE THE WINNER?

The CLEAN Student Award is visiting Navitas Aarhus, as a part of Jobtraf on November 4th 2015.

We are therefore in search of technical students with innovative approaches to their fields of study. This is your opportunity to showcase a report or product from your studies, which has an innovative angle on energy efficiency and intelligent energy systems.

What do I need to do?

Contestants are judged on their finished projects or products, so no extra work is required to participate!

In fact, to be taken into consideration, all you need to do is send a short abstract explaining the outline of your project or product.

Projects deemed suitable to compete will be judged against the following parameters:

- The innovation height of the project
- The team’s interpersonal and cross-disciplinary student skills (if applicable)
- The team’s ability to communicate project results
- The project’s economic opportunities (incl. market potential)

So, if you have an innovative report, project or product involving energy efficiency, grab the opportunity to win excellent prizes with a value of more than 4,000 kr, in addition to adding to your professional profile.

What is The CLEAN Student Award?

Is an opportunity for you to showcase your professional skills in competition with other technical students and hopefully be able to make valuable additions to your CV.

Registration

To register (or if you have additional questions) please send a project abstract to MTL@cleancluster.dk, no later than November 1st. Contestants will be notified by November 2nd.
