

List of Bachelor's Thesis Supervisors

For HA and BSc(B) students as well as
Erhvervsøkonomi med tilvalg of the
Department of Economics and Business Economics

On the following pages, you will find a list of the faculty members at the Department of Economics and Business Economics, who may be relevant thesis supervisors for HA and BSc students.

The list is divided according to your degree programme:

Accounting.....	3
Quantative methods and marketing research	4
Finance	5
Economics – business/micro/macro	8
Population and labour economics.....	12
Logistics and supply chain management.....	13

Before you register a supervisor and a title for your bachelor's thesis, you must contact a potential supervisor, who will commit to give you supervision within your chosen topic. The registered title will typically be a draft for your problem statement rather than your final problem statement. Please contact ONE supervisor at a time and await this supervisor's reply, before you contact any others.

Some topics (two examples are 'valuation of a specific firm' and 'industrial organisation') are often seen several times in the first list of topics/problem statements and, as a consequence, it can be a problem to find a supervisor with capacity to supervise (especially if you want to use lecturers from teaching). Check the list of supervisors in the same area to find an alternative supervisor; in case you are not successful finding a supervisor, please write your tentative topic AND that you don't have an agreement with a supervisor. The department guarantees that a very competent supervisor will be allocated to you immediately after the deadline for registration of your project.

You must register the working title of the thesis and the name of the supervisor **no later than 1 December**.

Here: <http://studerende.au.dk/en/studies/subject-portals/business-administration/bachelors-and-masters-thesis/bachelorsthesis/>, you can find rules, requirements, registration form and advice related to the writing of your bachelor's thesis.
