### Evalueringsmetode

Online via SurveyExact; filled in in class during the final session of the semester

### Beskriv 2 - 3 vellykkede undervisningsforløb/forhold

Broadly speaking, the evaluations were quite positive and a majority of students expressed satisfaction with the lectures, seminars, support materials, group work (out of class), and academic level for all courses.

The use of Google Docs (SMU project) that allowed students to give each other written feedback online as well as allow teacher's to give feedback on the feedback and feedback on the final essay was quite successful in Media and Culture Studies.

Students found the use of the "rammesat aktiviteter" and instructors in in Phonetics, Phonology and Morphology to be beneficial.

None the courses had negative evaluations.

### Redegør for evt. forløb, der skal rettes op på, hvis de skal udbydes igen

The percentage of students saying that they felt prepared for the exam was relatively low (under 50%) so this is an area that will be looked into.
