

OPSÆTNING AF STUDENTERMAIL

iOS (iPad & iPhone)

1. Open **"Settings"**.

2. Open settings for **"Mail"**. Choose **"Add Account"** and then **"Add Mail Account"**.

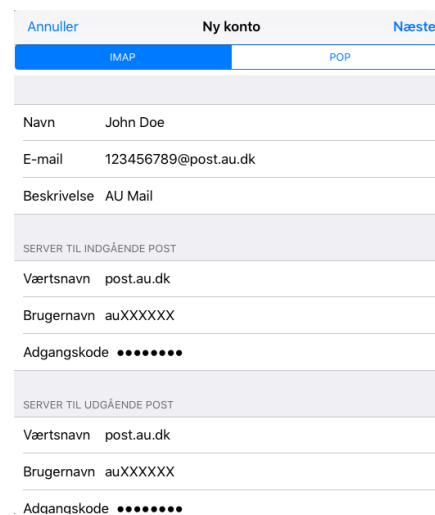

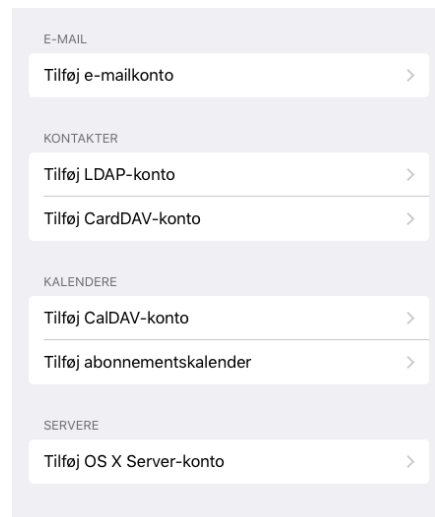

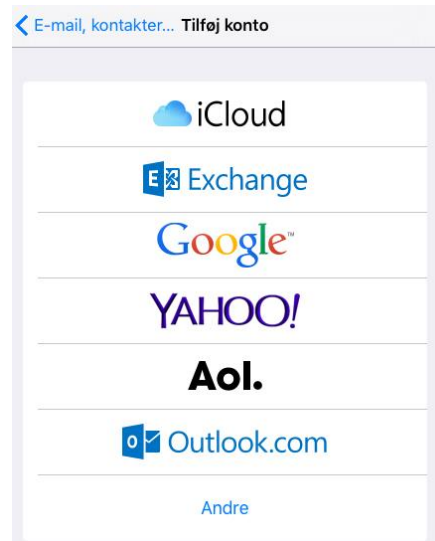

ATTENTION: In the newest versions of iOS the **"Add Account"**-option can be found under the settings for **"Accounts- and passwords"** (As seen on the picture) and NOT in **"Mail"**.

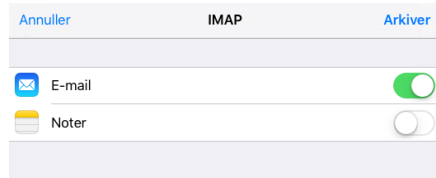

3. Choose "Other".

4. Write your **name**, your mail address in the form **studynumber@post.au.dk** as well as the **password** from the self-service platform. Choose a **Description** for your mail account. Press Next.

5. Make sure that "IMAP" is chosen in the top of the window. Write **post.au.dk** under "Host Name", your **auID** in the form **auXXXXXX** and your password under "Incoming Mail Server" as well as "Outgoing Mail Server". Press Next.

6. Make sure that **E-mail** is chosen. Press Save.

7. Your student mail should now synchronize and your mails should be visible in your mail-app. The configuration is done.
