

Evaluering, Linguistics Kandidat

Uddannelsens navn	MA Linguistics
Uddannelsens niveau	Kandidat
Uddannelsesnævn	LICS
Afdelingsleder	Joshua Skewes
Hvilken evalueringsmetode er anvendt	A combination of mid-term oral evaluations, blackboard survey evaluations, and final written evaluations.
Hvilke konkrete kurser omfatter denne opsummering	Child language acquisition and Project Workshop
Beskriv 2-3 vellykkede forløb/forhold, der kan være inspiration for andre	Both courses were rated positively. Child Language Acquisition covers a very broad theoretical and methodological field that is very important for students to acquire. Students reported that Project workshop had a slow start and a heavy end, but that this was to be expected when developing external collaborations, suggesting student expectations were particularly well managed.
Redegør for evt. forløb, der skal rettes op på, hvis de skal udbydes igen	The evaluations suggested that the MA courses were too demanding in terms of content and scope, requiring both new theoretical and new methodological material to be learned.
Anbefalinger til indsatsområder og særlige tiltag, som evalueringerne har givet anledning til	Discuss how to synthesize methodological and theoretical components of courses, so that students have the opportunity to acquire the same knowledge and skills on a more efficient schedule.
