

Calling all engineering students! Fancy rolling up your sleeves to help transform our app's user journey while turning your theoretical knowledge into practical use? Then we have the perfect opportunity for you!

Join us as part of a dynamic project team to explore the gaps in our app and conceive innovative solutions to fill them. It's all about design thinking – your perspective could help take our app experience from great to amazing!

Your role won't just stop at the drawing board. You will follow the entire process, starting from the initial user engagement right through to the end where they exit the app. A chance to fully immerse yourself in real-world application development!

You'll be working closely with our forward-thinking R&D team, enriched with hardware, software, and data talent. Collaboration doesn't stop there. You'll get a chance to liaise with different departments, including our user-focused Customer Success team and our dynamic Commercial team. An excellent way to gain a comprehensive understanding of how different parts of an organisation intertwine!

We're a youthful company based in Ballerup, setting up camp (quite literally!) at "The Camp," nestled within TRYG Insurance's HQ. We pride ourselves on being a diverse team and offer utmost flexibility when it comes to work locations. Whether you're at home, in the office, or even at a vacation house, we're more than happy to accommodate.

We're on the lookout for a project team of 2-4 students, making this the perfect opportunity to pair up with your classmates or meet new people.

Ready to take this exciting challenge head-on? Get in touch!
